

Innovative Systems, Inc.

Professional Services Consultant

Company Profile:

Innovative Systems, Inc. (ISI) develops and delivers enterprise customer information solutions to organizations whose success depends on a complete and accurate understanding of their customers. ISI is committed to continued growth as the leader in providing enterprise data quality, data enrichment, customer information process management and customer network business solutions to Fortune 1000 organizations worldwide. To achieve that goal, we are looking for talented, energetic individuals who want to provide unique, leading-edge solutions in the context of a professional, action oriented environment.

Location:

Corporate Headquarters in Pittsburgh, PA.

Qualifications:

BS or MS in computer or information sciences or equivalent. Prior work experience is a plus. Programming skills with C, C++, Java/J2EE, and/or COBOL required. Adept with windows and unix operating systems. Mainframe expertise a plus. Excellent written and verbal communication skills as the position requires much interaction with clients and colleagues. Database experience also a plus. Must be a U.S. citizen.

Job Description:

Team members will be responsible for maintaining all delivery phases of the customer relationship using proprietary software products. Principal responsibilities will include: implementation of products in various environments, integration with resident processes, customizations, on-site consulting and training services, pre-sales support, product justification, and project planning. A background in project management and experience relating technical solutions to business problems is a plus. Position is based in Pittsburgh, Pa and requires about 60% travel. International travel may also periodically be required.

Benefits:

Medical/Dental Insurance, 401(k) plan, Life Insurance, STD/LTD
